Keorapetse Tlhapane

DATA ANALYST

I thrive on the "eureka" moment of finding a hidden narrative within a sea of raw numbers. To me, data analysis is a blend of investigative problem-solving and storytelling; I love the challenge of taking fragmented, messy information and distilling it into a clear, strategic roadmap. There is an immense sense of satisfaction in providing the clarity that transforms a complex business uncertainty into a confident, evidence-based decision.

EXPERIENCE

DATA ANALYST RICHTRAU TRADING 22
Jun 2025 - Present

I leverage **SQL, Python,** and **Power BI** to transform complex tender and production data into actionable business intelligence. My work focuses on optimizing bid-win ratios through historical trend analysis, identifying material wastage in aluminium fabrication via advanced Excel modeling, and providing executive leadership with real-time dashboards to drive evidence-based strategy and operational efficiency.

TENDER ADMINISTRATOR RICHTRAU TRADING 22
Jan 2024 - Jun 2025

Managed the end-to-end coordination of competitive bids for construction and aluminium window projects. I ensured strict compliance with tender requirements, liaised with suppliers for accurate costing, and met rigorous deadlines to maximize the company's contract acquisition opportunities.

OBJECTIVE

To bridge the gap between raw data and strategic growth, I leverage statistical modeling and visualization to transform complex datasets into actionable intelligence. My objective is to provide the evidence-based clarity needed to optimize operations, mitigate risks, and drive informed executive decision-making.
